Resolved: 28.09.23

Subject: Pool pod & pool temperatures

1. How many pools does the Commonwealth have?
2. What temperatures are these pools?
3. Which pools have disabled access?
4. How does the pool pod system operate?

Response

1. How many pools does the Commonwealth have?

3

2. What temperatures are these pools?

Teaching pool – 30°

Main pool – 28°

Dive pool – 28°

3. Which pools have disabled access?

All pools have access to the pool pod – so are suitable for disabled access.

4. How does the pool pod system operate?

The Pool pod has a specific wheelchair for customers this will be placed in the pool pod with the support of the pool staff.

The Pod is then lowered into the pool. Customers who have limited mobility can also use the pod standing and can also be lowered into the pool. Please see link below for further information on the Pool Pod.
